

Finally a law to give us some peace and you want to overturn it! I am outraged! Before this law, we were receiving 10-20 unwanted telemarketer calls per day. And most of our message tape was used up by it. How's this for frustration? You're waiting for a call from the hospital or your physician, so you answer every call that day so you don't miss it, and you have to explain to 10 telemarketers why you can't talk right now. I think the people of NJ deserve better than this! And I don't feel like I should spend money for things like caller ID and call blocker in addition to paying for phone service which is already too high!
